The Honeymooner

Here's the best idea yet for combining exercise and transportation - the one and only *HONEYMOONER* Side-By-Side Cycle! It's fun and easy to ride, extremely stable, and a lot more comfortable than a standard bicycle or adult tricycle.

The *HONEYMOONER* is the perfect way to get around campgrounds, resort areas, retirement communities, trailer parks - anywhere you want to take your time, "smell the roses" and avoid the cost and hassle of an automobile.

No one takes a back seat!

The *HONEYMOONER* features an all-steel, welded frame, heavy-duty wheels, and molded bucket seats which can be adjusted for any size rider. Each side has a set of pedals and brake control so either rider can operate the *HONEYMOONER* independently.

The *HONEYMOONER* is manufactured exclusively by *BACHTOLD SPECIALTY PRODUCTS*.
